DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. The rejection of Claims 41, 44, 51 and 53 under 35 U.S.C. 112, second paragraph, is withdrawn because of the amendment filed 11/21/2008.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. The rejection of Claims 38, 41 and 52 under 35 U.S.C. 112, first paragraph, is withdrawn because of the amendment filed 11/21/2008.

Claim Objections

5. The objection to Claims 40 and 47 is withdrawn because these claims have been canceled.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. The rejection of Claims 52-53 under 35 U.S.C. 103(a) as being unpatentable over Denzinger et al (5175361) is withdrawn because of the arguments presented in the 11/21/2008 amendment.

8. The rejection of Claims 52-53 under 35 U.S.C. 103(a) as being unpatentable over Kirk et al (5601723) is withdrawn because of the arguments presented in the 11/21/2008 amendment.

9. The rejection of Claims 37-51 under 35 U.S.C. 103(a) as being unpatentable over WO 00/55391 is withdrawn because of the arguments presented in the 11/21/2008 amendment.

Art Unit: 1792

10. Claims 38-39, 41-46 and 48-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tada et al (6514357).

'357 teaches an aqueous composition to be applied to a metal surface that comprises (meth)acrylic derivatives, maleic derivatives, an acid such as phosphoric, alkali metal salts and organic amine salts (3:35-5:13). The application is by roll coater (9:1-7). The thickness of the applied layer is less than 3 um (see Table 2-2). After application, another film may be deposited on top (7:53-55). The composition appears to overlap with that claimed by applicant.
